For some time, the United States Coast Guard has been utilizing a standard form (CG 835) to memorialize the results of inspections it conducts at both regulated facilities and aboard vessels calling at ports.

Very recently, however, USCG launched new forms (CG 835F and CG 835V), which will have independent application to facility and vessel-specific (marine) inspections conducted by that agency. While CG 835F appears to present a rather blank slate, CG 835V appears to allow closer harmony with global port state control mandates. Examples of the new forms appear below.

ILA-USMX OSH Circulars are devised to reflect the best possible information and guidance, and are products of diligent research and the most up to date subject matter knowledge.
